ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

ADDITIONAL ADD-ON PROGRAM

Add-on courses are designed to equip the students to face the emerging challenges in the job market and another way to gain more knowledge on subjects.

Graduates who have completed add-on courses may be able to command higher salaries than their peers who have not completed additional training. This is because employers recognize the value of specialized expertise and are willing to pay a premium for it.

Significant progress has been made in recent years toward the successful development of drug delivery systems based on organic, inorganic, and hybrid nanoparticles as drug carriers for active targeting, particularly in chemotherapy. In the development of an optimal drug delivery system, recent drug delivery systems are recognized to be the newest developments and innovative understanding of the pharmacokinetic and pharmacodynamic behavior of pharmaceuticals. Advances in Drug delivery technologies have been proven to improve treatment outcomes in many ways, including enhancing therapeutic efficacy, reducing toxicity, increasing patient compliance, and enabling entirely new medical treatments.

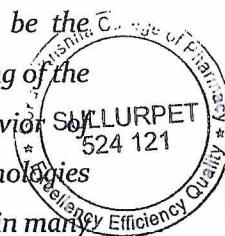

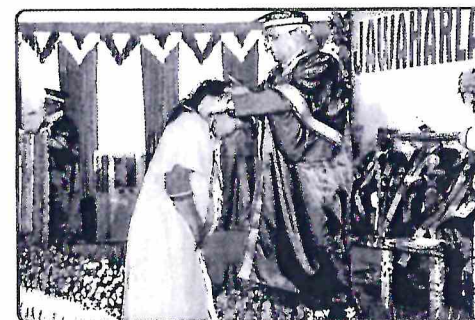

OBJECTIVE OF THE PROGRAM:

- To understand the criteria for selection of drugs and polymers for the development of Novel drug delivery systems, their formulation and evaluation,
- Impart knowledge and skills necessary to train the students in the area of novel drug delivery systems

OUTCOME OF THE PROGRAM:

- Design and evaluate the various customized, sustained and controlled release dosage forms
- Load with principles behind the development of various dosage forms
