ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

ABOUT ADD-ON PROGRAM

Add-on courses are designed to equip the students to face the emerging challenges in the job market and another way to gain more knowledge on subjects.

Graduates who have completed add-on courses may be able to command higher salaries than their peers who have not completed additional training. This is because employers recognize the value of specialized expertise and are willing to pay a premium for it.

Significant progress has been made in recent years toward the successful development of drug delivery systems based on organic, inorganic, and hybrid nanoparticles as drug carriers for active targeting, particularly in chemotherapy. In the development of an optimal drug delivery system, recent drug delivery systems are recognized to be the newest developments and innovative understanding of the pharmacokinetic and pharmacodynamic behavior of pharmaceuticals. Advances in Drug delivery technologies have been proven to improve treatment outcomes in many ways, including enhancing therapeutic efficacy, reducing toxicity, increasing patient compliance, and enabling entirely new medical treatments.

OBJECTIVE OF THE PROGRAM:

- To understand the criteria for selection of drugs and polymers for the development of Novel drug delivery systems, their formulation and evaluation,
- Impart knowledge and skills necessary to train the students in the area of novel drug delivery systems

OUTCOME OF THE PROGRAM:

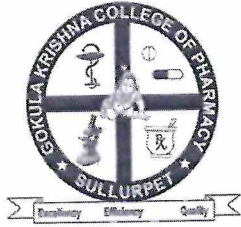

- Design and evaluate the various customized, sustained and controlled release dosage forms
- Load with principles behind the development of various dosage forms

Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

AFTER ADD-ON PROGRAM

Add-on courses are designed to equip the students to face the emerging challenges in the job market and another way to gain more knowledge on subjects.

Graduates who have completed add-on courses may be able to command higher salaries than their peers who have not completed additional training. This is because employers recognize the value of specialized expertise and are willing to pay a premium for it.

Standardization of herbal drug refers to "confirmation of its identity and determination of its quality, purity and detection of nature of adulterant by various parameters like morphological, microscopical, physical, chemical and biological observations." The quality control standards of various medicinal plants, used in indigenous system of medicine, are significant nowadays in view of commercialization of formulations based on medicinal plants.

OBJECTIVE OF THE PROGRAM:

- Understand the coordination between the quality of raw materials, in process materials and the final products.
- Develop reliable, specific and sensitive quality control methods using a combination of classical and modern instrumental method of analysis.

OUTCOME OF THE PROGRAM:

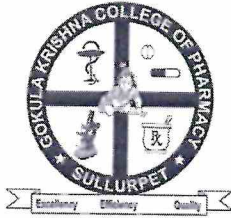

- Stand with a profound knowledge of the important herbs found in India a widely used in Ayurvedic formulation.
- Load with the knowledge of converting botanical materials into medicines.

- Objectives of the Program** : Towards acquirement of this course students should able to
- Understand the coordination between the quality of raw materials, in process materials and the final products.
 - Develop reliable, specific and sensitive quality control methods using a combination of classical and modern instrumental method of analysis.
- Topics covered** : Step down of Herbal drug development
- Standardization and evaluation:
 - Authentication procedure
 - Stability parameters
 - Guidelines for Herbal drug standardization
 - Monograph titles
 - Standardization of herbal drug
 - Evaluation of herbal products

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

ABOUT ADD-ON PROGRAM

Add-on courses are designed to equip the students to face the emerging challenges in the job market and another way to gain more knowledge on subjects.

Graduates who have completed add-on courses may be able to command higher salaries than their peers who have not completed additional training. This is because employers recognize the value of specialized expertise and are willing to pay a premium for it.

Molecular docking is a key tool in structural molecular biology and computer-assisted drug design. The goal of ligand-protein docking is to predict the predominant binding mode(s) of a ligand with a protein of known three-dimensional structure. It helps in identifying potential drug candidates by predicting the binding affinity of small molecules to a protein or receptor of interest. Docking can be used to screen a large database of small molecules to identify those that can bind to a protein of interest with high affinity. Molecular Docking enables the identification of novel compounds of therapeutic interest, predicting ligand-target interactions at a molecular level, or delineating structure-activity relationships (SAR), without knowing a priori the chemical structure of other target modulators.

OBJECTIVE OF THE PROGRAM:

- Realize that the studies significantly take part in novel drug development by rapid virtual screening of existing drug databases and in the discovery of new drugs.
- Understand an array of valuable tools for drug design and analysis

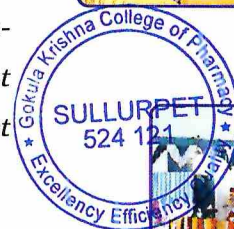

OUTCOME OF THE PROGRAM:

- Predict the ligands activity towards a target to perform structure-based drug design (SBDD).
- Assists the revealing of novel compound of therapeutic interest, forecasting ligand-protein interaction at a molecular basis and delineating structure activity relationships (SARs).
- Work independently and become a medicinal chemist.

PROGRAM REPORT

- Name of the Program** : A Two-week add-on program on "Epitomize of Molecular Docking"
- Date of the Program** : 07.02.2023 to 24.02.2023
- Details of the Resource Person** : **Dr. M .Sowjanya**
Professor, Dept. of pharmaceutical chemistry,
Gokula Krishna college of pharmacy, Sullurupeta,
Tirupati Dist. A.P.
Contact number: +91 9494795974
Mail id:soujipharma@gmail.com
- Objectives of the Program** : Towards accomplishment of this course, students should able to
- Understand the structural interactions of two or more chemical molecules and its critical role in rational of structure-based drug design.
 - Realize that the studies significantly take part in novel drug development by rapid virtual screening of existing drug databases and in the discovery of new drugs.
 - Understand an array of valuable tools for drug design and analysis.
- Topics covered** : Rundown of molecular docking with its
- Basics
 - Types
 - Theories
 - Approaches

Dr. BALAGANI PAVAN KUMAR

- Mechanisms
- Applications in pharmacy

Outcome of the Program : On triumphant completion of this program, a student will be expected to be able to

- Aids in the investigation, interpretation, explanation, and discovery of molecular features through the use of ligand protein three-dimensional structures.
- Predict the ligands activity towards a target to perform structure-based drug design (SBDD).
- Assists the revealing of novel compound of therapeutic interest, forecasting ligand-protein interaction at a molecular basis and delineating structure activity relationships (SARs).
- Work independently and become a medicinal chemist.

Number of Participants : 28

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

ABOUT ADD-ON PROGRAM

Add-on courses are designed to equip the students to face the emerging challenges in the job market and another way to gain more knowledge on subjects.

Graduates who have completed add-on courses may be able to command higher salaries than their peers who have not completed additional training. This is because employers recognize the value of specialized expertise and are willing to pay a premium for it.

GMP stands for Good Manufacturing Practices, and refers to a set of guidelines created by the Food and Drug Administration. The pharmaceutical industry has put these practices into place to ensure that all products are safe, pure, and high quality. cGMP regulations always refer to the newest technologies available at the time of production. The major difference is that cGMP is focused on continuous improvement and means the most up-to-date standards and technologies are being employed to assure quality, whereas GMP are considered a set of principles that help manufacturers develop processes to ensure quality.

OBJECTIVE OF THE PROGRAM:

- Understand the requirements in order to conform to the guidelines recommended by agencies that control the authorization and licensing of the manufacturing and sale of pharmaceutical products.
- Learn a set of regulations for manufacturers, processors and packagers of drugs and to ensure the safety, purity, and effectiveness of drug products.

OUTCOME OF THE PROGRAM:

- Establishes the foundation for drug product quality.
- Packed with professional workforce who is essential to meet the dual goals of business requirements and regulatory expectations.

Topics covered

: Rolling down of GMP & cGMP of medicinal products and

- SOP's and its implementation
- Quality assurance
- Quality control
- Quality risk management
- Documentation procedure
- Validation
- GMP audits

Outcome of the Program

: On successful completion of this program, a student will be expected to be able to

- Build the highest standards of efficiency, quality and safety in any process involving the manufacture of pharmaceutical products.
- Prevent incidences of product mix-ups, contamination, deviations, failures and errors which in turn assure that drug products meet the required quality standards.
- Establishes the foundation for drug product quality.
- Packed with professional workforce who is essential to meet the dual goals of business requirements and regulatory expectations.

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

AF JUT ADD-ON PROGRAM

An Add-on course is a course that, one can learn along with the regular degree programs, which will mould the students with employable skills. These programmes enable the students to acquire a more holistic perspective and thus have better understanding of issues present-day industry challenges and also facilitate the students to gain and develop innovative and creative skills through a wide array of course offerings.

Pharmacists should have the necessary computer skills to help them remain productive at work. These include the ability to use the essential programs, such as email and Microsoft Office tools. Computers in pharmacy are used for the information of drug data, records and files, drug management (creating, modifying, adding and deleting data in patient files to generate reports), business details. In field of operation like new drug discovery, drug design analysis, and manufacturing of drugs and in hospital pharmacy computers are widely used. The drug discovery, designing, manufacturing and analysis have become virtually possible only through the development of upcoming various hard wares and soft wares.

OBJECTIVE OF THE PROGRAM:

- Learn the various applications, software's and use of computers in pharmacy
- Understand the importance of computer science and technology in pharmacy field everywhere like pharmacy colleges, pharmaceutical industries, research centers, hospital pharmacy and many more.

OUTCOME OF THE PROGRAM:

- Work effectively with a range of current, standard, office productivity software applications
- Improves employability skills.

- Computers in pharmaceutical formulations

Outcome of the Program : Upon successful execution of this program, a student will be expected to be able to

- Illustrate the applications, software and its use in pharmacy
- Load with computer operating skills
- Work effectively with a range of current, standard, office productivity software applications
- Improves employability skills.

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

ABOUT ADD-ON PROGRAM

An Add-on course is a course that one can learn along with the regular degree programs, which will mould the students with employable skills. These programmes enable the students to acquire a more holistic perspective and thus have better understanding of issues present-day industry challenges and also facilitate the students to gain and develop innovative and creative skills through a wide array of course offerings.

Pharmaceutical instruments are various fundamental devices that play a vital role in the medicine and pharmaceutical fields. It is an analytical measuring device usually found in medical facilities and laboratories. Each type of instrumentation plays an important role in each unique step of the manufacturing process. Instrumentation for the pharmaceutical industry requires the highest level of precision, reliability, and quality. The primary function of pharmaceutical instruments is to determine, test, study, observe and analyze particular medicine, drug, and other pharmaceutical compounds.

OBJECTIVE OF THE PROGRAM:

- Understand the advanced qualitative and quantitative aspect of different spectroscopic methods and separation techniques
- Learn the fundamental principles and instrumentation of various analytical instruments in qualitative and quantitative analysis of drugs

OUTCOME OF THE PROGRAM:

- Focus on development of analytical methods using new combinations of established instrumentation and approaches
- Develop important employability to become a successful scientist in the pharmaceutical industrial career.

PROGRAM REPORT

- Name of the Program** : A Two-week add-on program on "The Instruments Involved in Pharmaceutical Analysis"
- Date of the Program** : 26-07-2022 to 11-08-2022
- Details of the Resource Person** : **Mr. A.V.L.S.Ramakrishna**
Asst. Professor, Dept. of Pharmaceutical analysis,
Gokula Krishna college of pharmacy, Sullurupeta,
Tirupati Dist. A.P
Contact number: +91 7382956756
Mail id: atchutapharma431@gmail.com
- Objectives of the Program** : Towards accomplishment of this course students should be able to
- understand the advanced qualitative and quantitative aspect of different spectroscopic methods and separation techniques
 - Learn the fundamental principles and instrumentation of various analytical instruments in qualitative and quantitative analysis of drugs
 - Apply the concepts in various steps like
 - Sample preparation
 - Quality control analysis
 - Validation of analytical methods used in industry
- Topics covered** : Course was fraught out with
- Types of pharmaceutical analysis

GOKULA KRISHNA COLLEGE OF PHARMACY

- Titration
- Melting point and boiling point
- Disintegration
- Dissolution
- Chromatography
- Spectroscopy

Outcome of the Program

: On successful completion of this program, a student would be expected to be able to

- Demonstrate knowledge about fundamental principles and instrumentation of various analytical instruments in qualitative and quantitative analysis of drugs
- Develop ability to work in pharmaceutical industries on analytical methods, instruments, analytical method development.
- Loaded with key skills in Pharmaceutical analysis including analytical science and techniques.
- Focus on development of analytical methods using new combinations of established instrumentation and approaches
- Develop important employability to become a successful scientist in the pharmaceutical industrial career.
