ERP DOCUMENT

Enterprise Resource Planning (ERP) is essential for institutions seeking enhanced operational efficiency through a centralized and integrated automation system. It facilitates the management of stakeholder data and streamlines various functions such as administration, admissions, accounts, library services, examinations, and transportation. By leveraging ERP software, an institution can consolidate diverse functional areas and their respective sub-functions related to stakeholders. Access rights are allocated based on organizational hierarchy to enable the seamless execution of daily tasks. The centralized database of the ERP system facilitates efficient data retrieval, enabling precise data extraction for report preparation and analysis. Adequate vendor support for software utilization and maintenance is crucial for optimizing the benefits of ERP in managing institutional activities.

In 2022, the institution acquired a comprehensive automation package from HirotoIND Technologies for college management software. This software caters to various institutional needs encompassing administration, admissions, student records, library management, financial operations, and examination processes for both undergraduate and postgraduate programs.

The features of the software includes: Front Office, Student Information, Fee Collection, Income and Expenditure, Staff Details, Attendance, Academics, Examinations, and Library etc.

Dr. BALAGANI PAVAN KUMAR
