ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

AI)UT ADD-ON PROGRAM

Add-on courses can help students to develop important employability skills such as teamwork, communication, and problem-solving. These add-on programs supplements students learning and enhances their preparedness to meet the challenges of professional life. These skills are highly valued by employers, and graduates who have these skills are more likely to be successful in their careers.

Medical coding is the process of taking a patient's health care information like medical procedures, diagnosis, necessary medical equipment, and medical services information from the physician's notes. A medical coder transforms this information into universal medical alphanumeric codes.

OBJECTIVE OF THE PROGRAM:

- Learn the medical terminologies like abbreviations, symbols and special terms
- Learn the documentation requirements in medical coding
- Acquire skill in coding manual, code sets

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

AIJUT ADD-ON PROGRAM

Add-on courses can help students to develop important employability skills such as teamwork, communication, and problem-solving. These add-on programs supplement students learning and enhances their preparedness to meet the challenges of professional life. These skills are highly valued by employers, and graduates who have these skills are more likely to be successful in their careers.

The validation process involves identifying and documenting the specific requirements that are established to manufacture the product and then demonstrating that the product consistently meets those requirements. This includes testing the process parameters relevant to the making of the product and verifying that the process is free from defects and functions as intended. Additionally, validation includes continuous monitoring and re-evaluation to ensure that the product or process remains in compliance with the established requirements. By implementing robust validation protocols, pharmaceutical companies can ensure that, mitigate risks associated with pharmaceutical products and processes, ensuring that products are of high quality, meet specifications, and are manufactured using appropriate processes.

OBJECTIVE OF THE PROGRAM:

- Understand the concept of calibration, qualification and validation
- Know about qualification of various pharmaceutical equipments and instruments.
- Learn the process validation of different dosage forms

OUTCOME OF THE PROGRAM:

- Mitigate the risks associated with pharmaceutical products and processes thereby can produce high quality products
- Build employability skills because employer recognize the value of specialized expertise

➤ Equipment validation

- GMP
- GLP

Outcome of the Program : Upon successful completion of this program, a student will be expected to be able to

- Describe the importance of calibration to be performed for the instruments
- Describe and Perform various validation processes like instrumental validation, cleaning validation, process validation in pharmaceutical industry
- Mitigate the risks associated with pharmaceutical products and processes thereby can produce high quality products
- Build employability skills because employer recognize the value of specialized expertise.

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

ABOUT ADD-ON PROGRAM

Add-on courses can help students to develop important employability skills such as teamwork, communication, and problem-solving. These add-on programs supplements students learning and enhances their preparedness to meet the challenges of professional life. These skills are highly valued by employers, and graduates who have these skills are more likely to be successful in their careers.

The pharmaceutical quality control laboratory serves one of the most important functions in pharmaceutical production and control. A significant portion of the CGMP regulations pertain to the quality control laboratory and product testing. Quality control laboratories may perform some or all quality control activities, e.g. sampling, testing of APIs, excipients, packaging materials with standardized and suitable instruments. Quality control (QC) processes are used to determine whether a certain procedure or action conforms to a widely accepted standard and/or set of guidelines, and are important components of any laboratory quality assurance program.

OBJECTIVE OF THE PROGRAM:

- Understand the theoretical aspects of various analytical techniques
- Recognize the basic practical skills using analytical instrumentation techniques

OUTCOME OF THE PROGRAM:

- Expand the theoretical knowledge on various instrumental techniques available for analysis of organic substances
- Apply the knowledge learnt in developing a new procedures of their own design in regulatory writing and submission to agencies

A handwritten signature in green ink, appearing to read 'Balagani'.

PROGRAM REPORT

- Name of the Program** : A Two-week add-on program on "A Consummative View of Quality Control Instruments in Pharma Lab"
- Date of the Program** : 28-11-2019 to 13-12-2019
- Details of the Resource Person** : **Mr. P.Sivakumar**
Asso.professor, Dept. of Pharmaceutical chemistry,
Gokula Krishna college of pharmacy, Sullurupeta,
SPSR Nellore Dist. A.P
Contact number: +91 9494144800
Mail id: sivapeta369@gmail.com
- Objectives of the Program** : Towards consummation of the program, students would be able to
- Understand the theoretical aspects of various analytical techniques
 - Recognize the basic practical skills using analytical instrumentation techniques
 - Understand the basic knowledge on assay of single and multiple component pharmaceuticals by using various analytical instruments
 - Compare various methods of analysis and their outcomes
- Topics covered** : Course was started with Principal types of chemical instrumentation
- Chemical methods

➤ Gravimetric method

➤ Volumetric method

➤ Gasometrical

- Physico-chemical methods
- Microbiological methods
- Biological methods

Outcome of the Program : Upon victorious completion of this program, a student would be expected to be able to

- Develop basic practical skills using instrumentation techniques
- Expand the theoretical knowledge on various instrumental techniques available for analysis of organic substances
- Apply the knowledge learnt in developing a new procedures of their own design
- Identify and quantify a substance, components of a pharmaceutical solution or mixture
- Determine the structure of chemical compounds used in formulation of pharmaceutical product.

A.Y: 2019-2020

Course Schedule

Course Name : A Two-week add-on program on "Precise view of Quality Control Requirements for Pharmaceutical Dosage Forms"

Course Duration: Two weeks (15-10-2019 to 30-10-2019)

S.No	Session Date	Topics to be Covered
1	15-10-2019	Introduction to pharmaceutical dosage forms
2	16-10-2019	QC & GMP
3	17-10-2019	QA& IPQA
4	18 -10-2019	Common sources of quality variation: Materials, Machines
5	19-10-2019	Common sources of quality variation: Men, Premises
6	21-10-2019	Pharmacopeial methods and specifications
7	22-10-2019	Quality control requirements for Tablets & capsules: Hardness, Friability, Weight uniformity, Uniformity of content
8	23-10-2019	Quality control requirements for Tablets & capsules: Dissolution test, disintegration
9	24-10-2019	Quality control requirements for semisolid dosage forms: Evaluation of physical appearance, Loss of water, Consistency
10	25-10-2019	Quality control requirements for semisolid dosage forms: Assay, Identification test, Test for microbial content, Melting range, softening time
11	26-10-2019	Quality control requirements for liquid dosage forms: Pourability, viscosity, Isotonicity, pH
12	28-10-2019	Quality control requirements for liquid dosage forms: Particle size agglomeration and particle size distribution
13	29-10-2019	Quality control requirements for liquid dosage forms: Sterility test, membrane filtration method
14	30-10-2019	Quality control requirements for liquid dosage forms: Pyrogen test, Particulate matter test, weight variation test

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

AP JUT ADD-ON PROGRAM

Add-on courses can help students to develop important employability skills such as teamwork, communication, and problem-solving. These add-on programs supplements students learning and enhances their preparedness to meet the challenges of professional life. These skills are highly valued by employers, and graduates who have these skills are more likely to be successful in their careers.

Pharmaceutical formulation quality control is a critical process in medication production. It is a technique or series of procedures aimed to ensure that identical batches of pharmaceuticals are produced that meet the stated requirements. Quality control considers both quality and quantity. Pharmaceutical dosage form quality must also be considered during plant building, product study and development, material purchasing, manufacture, monitoring, auditing, packaging, labeling, storage, and distribution.

OBJECTIVE OF THE PROGRAM:

- Learn the importance of QA&QC
- Understand the common sources of quality variation
- Identify the quality elements throughout the test

OUTCOME OF THE PROGRAM:

- Describe the quality control standards for pharmaceutical dosage forms as well as the sort of tests required to minimize or eliminate the risks of marketing unsafe products
- Ensure that they can produce high quality medicines to patients in regulatory writing and submission to agencies

PROGRAM REPORT

- Name of the Program** : A Two-week add-on program on "Precise view of Quality Control Requirements for Pharmaceutical Dosage Forms"
- Date of the Program** : 15-10-2019 to 30-10-2019
- Details of the Resource Person** : **Miss. C.B. Hanisha,**
Asso. Professor, Dept of Pharmaceutics,
Gokula Krishna college of pharmacy, Sullurupeta,
SPSR Nellore Dist. A.P
Contact number: +918019538344
Mail id : hanisha800@gmail.com
- Objectives of the Program** : Towards completion of the program of this course, students would be able to
- Learn the importance of QA&QC
 - Understand the common sources of quality variation
 - Identify the quality elements throughout the test
 - Learn how to enhance the product quality and reduce risks
 - Learn the evaluation methods and processes of production in the manufacturing of solids, semisolids and liquids.
- Topics covered** : Course was scrolled down with Quality assurance and
- QC &GMP
 - Quality assurance
 - Common sources of quality variation
 - Quality control requirements for

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

ABOUT ADD-ON PROGRAM

Add-on courses can help students to develop important employability skills such as teamwork, communication, and problem-solving. These add-on programs supplements students learning and enhances their preparedness to meet the challenges of professional life. These skills are highly valued by employers, and graduates who have these skills are more likely to be successful in their careers.

Indian pharmaceutical sector is rising very rapidly and there is a want of regulatory affairs professionals to provide the current needs of industries for the global competition Regulatory affairs professionals are the link between pharmaceutical industries and worldwide regulatory agencies. They are required to be well versed in the laws, regulations, guidelines and guidance of the regulatory agencies. There is a growing need to incorporate the current requirements of pharmaceutical industries in the standard curriculum of pharmacy colleges to prepare the students with the latest developments to serve the industries.

OBJECTIVE OF THE PROGRAM:

- Learn how to prepare check list and SOPs for various good regulatory practices
- Learn various laws, legislation and guidelines related to safety, efficacy ethical conduct and regulatory approval of clinical research

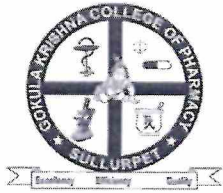

OUTCOME OF THE PROGRAM:

- Implement Good regulatory practices for pharmaceuticals
- Prepare the check list and SOP's for GRP
- Handle documentation and general principles involved in regulatory writing and submission to agencies

PROGRAM REPORT

- Name of the Program** : A Two-week add-on program on "Exhaustive View on Regulatory Affairs in the Pharmacy Curriculum"
- Date of the Program** : 16-09-2019 to 01-10-2019
- Details of the Resource Person** : **Miss. Y.Swaroopa**
Asst. Professor, Dept. of Pharmaceutics,
Gokula Krishna college of pharmacy, Sullurupeta,
Nellore Dist. A.P
Contact number: +91 8143547448
Mail id: swaroopay345@gmail.com
- Objectives of the Program** : Towards completion of the program of this course, students would be able to
- Understands the rationale behind regulatory requirements
 - Learn how to prepare check list and SOP's for various good regulatory practices
 - Learn various laws, legislation and guidelines related to safety, efficacy ethical conduct and regulatory approval of clinical research
 - Understand the regulations and legislation in India
- Topics covered** : Course was scrolled down with
- Good regulatory practices
 - Documentation and regulatory writing
 - Clinical research regulations
 - Drug regulations in India

ABOUT COLLEGE

Gokula Krishna College of Pharmacy (GKCP) is established in the year 2007 which is sponsored by Sri Krishna Educational Society, Hyderabad. The institution was started with an idea of imparting pharmacy education in rural area, but now it has students from all over state. Though young, GKCP has made a significant impact in various areas of teaching and research, and continues to strive for excellence. The institute was approved by the Pharmacy Council of India (PCI), All India Council of Technical Education (AICTE) and State Govt. of Technical Education, AP. The institute has been offering four year's B.Pharmacy course (100), two year's M. Pharmacy course (Pharmaceutics-18 & Pharmacology-18) which is affiliated to JNTUA, Anantapuramu.

"Our mission is to educate students from all over the state even country including those from the local and rural areas so that they become enlightened individuals improving the living standards of their families, industry and society. We will provide individual attention world class quality of education and character building.

AF JUT ADD-ON PROGRAM

Add-on courses can help students to develop important employability skills such as teamwork, communication, and problem-solving. These add-on programs supplements students learning and enhances their preparedness to meet the challenges of professional life.

These skills are highly valued by employers, and graduates who have these skills are more likely to be successful in their careers.

Pharmacovigilance is defined as the science of detection, assessment, understanding, and prevention of adverse effects of drugs or other related problems. The main goal of pharmacovigilance is thus to promote the safe and effective use of health products, in particular by providing timely information about the safety of health products to patients, health-care professionals, and the public.

OBJECTIVE OF THE PROGRAM:

- Learn importance of safety monitoring
- Identify the Pharmacovigilance methods applicable for data collection for safety monitoring
- Identify the stakeholders and understand how to work with it to minimize the risk and how to improve patient care and safety.
